Air conditioners, heat pumps including geothermal and packaged products. Look on the back of your unit, and you'll find the model number listed on a silver series rating-plate located above the service valve connections. If your heat pump is geothermal, the model information should be easily found on the front of the unit. Gas or oil furnace

Product Literature | Carrier Residential
The outside air intakes for the heating and cooling system are at the base of the windshield. Keep this area clear of leaves and other debris. The system should be left in fresh air mode under almost all conditions. Keeping the system in recirculation mode, particularly with the A/C off, can cause the windows to fog up.

If all DTCs are not present, there is an open or short circuit in a wire between ECC control unit and damper motor which applies to DTC. See AUTOMATIC A/C-HEATER SYSTEM DIAGNOSTIC TROUBLE CODES table, then go to next step. If all DTCs are present, an open circuit is present in common ground at ECC terminals A9 and A10. See Fig. 10.
